Roblox is an online virtual sandbox game engine developed by Roblox Corporation that allows users to create and play a wide variety of games using a Lua programming language. The game engine lets users access a library of games created by other users, and players can create their own games and play them within the Roblox environment. Roblox is free to play, with microtransactions available through a virtual currency called Robux.

Robux can be purchased using real currency or through in-game purchases and advertising. Robux can also be earned by playing games.

The game has become one of the most popular online games for children, and Roblox

lists over 24 million monthly active users as of September 2018, of which more than half are children aged 6 to 14. Since the game's launch in 2004, Roblox has continued to change with the times, adding new features and experimenting with genre diversity.

Roblox is an avid innovator, having experimented with new genres including sandbox games, role-playing games, and hidden object games, as well as popular game genres such as shooters and fighting games.

Roblox lists more than 164 million monthly active users as of August 2020, of which more than half are children under the age of 16.

Roblox is often criticized for its clear restrictions on the use of harmful or illegal content, including false or misleading advertising, among other reasons. Roblox is a free-to-play game, which can lead to exploitation and bullying, as well as to financial loss and inactivity. Critics describe the typical interactions within the game as "garbage", particularly when the game encourages players to spend real money to buy in-game currency and to buy virtual goods

that are either unnecessary or not worth the price.[1][2] Some critics also describe in-game advertising as exploitative, and characterize Roblox as a business model that allows children to be exploited.[3][4][5] The site has been dubbed the "World's Worst Company" by critics and commentators.[6][7] In addition to criticism, Roblox has been praised for its innovations in the video game industry, for its accessibility to children, and for creating a community of video game creators.[8][9] Platform, Game Features, and Game Creator: Roblox.org — The Roblox website where users create games.
