Welcome to The James Joyce Grapevine, an online print publication devoted to bringing you independent coverage and commentary of modernist literature, its history, and contemporary relevance. Our goal is to serve those who appreciate the quality of Joyce's writing and the vibrant intellectual atmosphere its scholarship and influence have created. If you're not yet familiar with the period, *A Portrait of the Artist as a Young Man*, seems pretty daunting. Its first volume contains over 3,000 pages, most of it Joyce's own stream-of-consciousness journal entries. Think of it as an extended epistolary novel that weaves together the narrative viewpoints of each of its various characters. A third volume remains to be completed. At their heart, *A Portrait* is a coming of age story, which Joyce refers to as his "St. Sebastian." Not only does the hero, Stephen Dedalus, experience his own conversion, he also undergoes a minor one. The book was originally published in 1904. It was a hit.

While I certainly can't speak for others, I came to modernist literature through Joyce. Then I discovered Waugh's *Brideshead Revisited* and Evelyn Waugh turned me into an Anglophile. (I still have a copy of *Brideshead*, though I have to confess its shorter, lesser-known sequel, *The Vile Bodies*, is my preferred read.) I didn't get into modernist writing until the 1990s, when I discovered James Joyce and T.S. Eliot and reread the classics. I started with *Ulysses*, but *A Portrait* was my gateway drug. Glad to have you with us. I hope you'll become a regular subscriber. Perhaps you'll even share your favorite Joyce texts with me and the rest of the community over on the Grapevine Discussion Board. There's a lot of Joyce reading and discussion happening out there.
