"Microsoft have released a new security update for Windows 10 that introduces support for Universal Windows Platform (UWP). The security patch is focused on older devices and features a security bulletin that is designed to help protect data on systems from being stolen or from being lost by a user with physical access to the device. The update is mandatory for all Windows 10 users and is recommended to all Windows 10 Mobile users." Category:2018 software Category:Windows 10

Determination of Antioxidant Capacity of Semi-Solid and Liquid Systems Using a Copper-Based Free Radical Scavenging Assay and a Conditional Zinc-Tetraphenylporphyrin Fluorescence Response. A copper-based free radical scavenging assay using 3-(4,5-dimethylthiazol-2-yl)-2,5-diphenyl tetrazolium bromide and a conditional zinc-tetraphenylporphyrin fluorescence response in a semi-solid (4:1, v/v, chloroform:water) and a liquid (alcohol) medium were developed. These models were used to determine the antioxidant capacity (AOC) of natural and pure antioxidants, respectively, belonging to the classes of polyphenols, carotenoids and sulphur compounds. The semi-solid system was useful to determine the AOC of polyphenols and the overall capacity of these compounds being related to their concentration, whereas the liquid system was more suitable for carotenoids. The conditional zinc-tetraphenylporphyrin fluorescence response in a liquid medium was applied for the first time, and the use of a small molecule (azobenzene) as a quencher of the zinc-tetraphenylporphyrin fluorescence allowed to evaluate the AOC of sulphur compounds. In the semi-solid system, comparison with the results obtained from the DPPH assay demonstrated that the copper-based free radical scavenging assay could be applied to evaluate the AOC of antioxidants in natural products.

One of the most remarkable scenes in professional wrestling history has taken place at WrestleMania 34 this past weekend. While there have been some rumors of the match being altered or taken off the card, they have been proven false. Instead, The Undertaker has accomplished something that has never been done before — successfully defending his WWE Championship against Roman Reigns at WrestleMania. The match for the Intercontinental Championship has been teased for weeks. It 55cdc1ed1c
