What's New In AutoCAD?

Automate precision when drawing closed loops, solids, and arcs. The result: More accurate and consistent results that are less prone to error. (video: 1:14 min.) Right click on any command in the ribbon to access the help files. Print previews: Print snapshots of your drawing to a single sheet for easy review. Paper types: Access various paper types (paper, composition board, vinyl laminate, and cardboard) in a single drawing. You can also enable the “high contrast” setting to see the line that’s drawn against the background of the paper. Ink management: Reduce ink usage by using only the area needed for your drawing. Generate ink reports to visualize your ink usage. Paste

from an open document: Insert paste from other open drawings, printouts, and PDFs. Command Assist and easier file transfer: Improve command selection and error messages by providing more context. Drawings on your mobile device: From the mobile app, draw and share drawings directly to Dropbox, OneDrive, and other cloud accounts. Show marker icons on your mobile device: With a simple gesture, you can indicate specific objects for annotation on mobile devices. Easier graph layouts: Draw clearer graphs and simplify repetitive tasks. Keyboard shortcuts: We added a bunch of new keyboard shortcuts to speed up your workflow. Automatic line end detection: Automatically detect when you're drawing closed curves and open lines. Draw straight lines on curved surfaces: Draw straight lines

on curved surfaces, like floors, roofs, and walls. New tools in the command panel: Here's a list of the new tools that's available in the command panel. Align commands: Align command extends the existing align commands. (video: 2:05 min.) Angle snap: The angle snap tool can now snap to line intersection points and perpendiculars. Compare tool: The compare tool now enables comparison of line segments and 3D objects, making it easy to compare different object types in the same drawing. Crop (erase) tool: The crop tool can now erase geometry that'

System Requirements For AutoCAD:

You will need to have java 7 installed in your computer in order to play the game. If you are unsure if you have Java 7 installed in your computer, you can check it out here. As the game is currently a 3D environment, you will need a graphics card with at least DirectX11 to run it smoothly. For best performance, I highly recommend that you have a dedicated graphics card instead of a multi-card setup. Keep in mind that the game is free to play, but you will need to pay to create and upload worlds.
