Tenorshare HEIC Converter Activation Key Free

Convert HEIF/HEIC images to JPG/PNG/PDF High conversion speed Convert multiple files at once Support HEIC/HEIF files on iPhone Check for updates automatically Export HEIC/HEIF images to JPG/PNG/PDF Convert HEIF/HEIC images to JPG/PNG/PDF Tenorshare HEIC Converter Activation Code has been redesigned to adopt iOS 11's native image formats, which is why the program automatically decodes HEIF and HEIC images and converts them to the JPEG or PNG file type. In addition to enabling you to choose output formats such as JPEG, the program also offers you the

possibility to convert HEIF and HEIC files on your iPhone. To do so, you need to pair the iPhone with your computer (if it is connected) and run Tenorshare HEIC Converter. After clicking "Convert", you can select the output format, output path and quality of the converted graphics. Speed will be crucial for the new image format, which is why the HEIC Converter software is capable of converting even hundreds of photos at a time. Furthermore, because this program is not tied to a specific storage media (such as the memory card), you can directly save the converted data in a file format of your choice. When you convert the HEIF or HEIC images, the program also prompts you to choose the name, author, type of album and orientation of the newly created files. You can also decide whether the images should be automatically organized by name or you should scan through them to make them yours manually. On a positive note, the program's design is simple and intuitive. Its interface lets you make further adjustments, such as saving the output files, without going through a complicated Settings panel. Convert HEIC/HEIF files on your PC or your iPhone Focusing on functionality and ease of use more than anything else, Tenorshare HEIC Converter features a simple main window that offers two alternatives: either to convert HEIC and HEIF images you are storing locally on the host PC or process photos that are located on your iPhone. The latter option requires that your iPhone (with iOS 11) is connected to the computer and that iTunes is installed beforehand. Whichever path you decide to take, the next screen is designed to help you select the input data. While you can add files on your computer manually, Tenorshare HEIC Converter b7e8fdf5c8

Tenorshare HEIC Converter Crack +

- Convert HEIC (High-Efficiency Image Format) files to PNG format, save them in a file, or create a PDF file
- Extract files from iPhone to computer
- Convert HEIF (Apple's High-Efficiency Image Format) files to PNG format, save them in a file, or create a PDF file
