(Hell yeah!) This is what I love about the Instincts: they give you a lot of freedom. I am a very firm believer that if a shoe says leather, it doesn't have to mean shoes that you can't do certain things in. My only question to you is, what do you love to do when you're not working out? And, what kind of shoe/s do you love to wear out for fun? My ultimate footwear is a simple black sneaker, so I hope to be able to share a few tips with you guys! 648931e174

I need to pre-populate database with some values from a file, so I'd like to be able to run a shell script on that file. My app is like this: var url = require('url'); var async = require('async'); var google = require('googleapis'); var db = null; /* * This is

```
custom function that queries my existing data from my google * account and
loads it into db (this function is called every 1 second) */ function
updateDatabase() { var query = new google.apps.admin.db.Query("SELECT *
FROM'mydata.json'"); query.send(function (error, response) { if (error) return
console.log(error); db = response; }); }; /* * Main function that starts and kicks
this process every 1 second */ function mainFunction() { db = null;
async.series([ function () { updateDatabase(); }, function () { // code to be run
on every 1 second } ]); } app.yaml runtime: nodejs10 handlers: - url:.* script:
index.js index.js is just a wrapper over express route. I'd

How do I setup SSL? My Android/Java app is on its way and I would prefer to have a simple

configuration for testing the app. I have access to the server, so I could also setup a simple web server locally that I could switch between the client and the SSL client. I've tried many tutorials, but they end up with such a complex configuration, that its not worth the time. I'd prefer just to define a new url that is redirecting to the configured Apache server. The Apache server is currently running on port 8888. A: If you have access to the server and you have access to OpenSSL: Dietary polyunsaturated fat protects against microvascular endothelial dysfunction in Type 2 diabetes. Dietary fats, and in particular the type of fat, can affect macrovascular disease through mechanisms that include effects on triglyceride-rich lipoproteins (chylomicrons, VLDL, and LDL) as well
